

## Continuing Education Certificate

BC Comprehensive Dental Treatment Seminars

Lecture Titles:

- 1) Immediate vs. delayed placement of implants into fresh extraction sockets.
- 2) Interdisciplinary Management of Aesthetic Problem Cases.

Speaker: Dr. Dennis Tarnow

Date: January 19, 2024

CE Hours: 7 hours

Sponsors: BC Comprehensive Dental Treatment Seminars, Sea To Sky Dental Seminars

Description (learning objectives):

- Identify what type of healing takes place against the implant in immediate socket placement
- Know how to minimize recession with immediate provisionalization
- Know the proper crown contour for immediate provisionals
- Know if the gap distance really matters
- Know if primary closure should be attempted or should it be left open
- Know if membranes should be utilized
- Know what type of graft material if any should be utilized
- Identify what are the potential short- and long-term risks involved with immediate placement of implants
- No buccal plate, no implant
  
- Which teeth to save or extract
- Know if implants should be placed immediately or in a delayed protocol
- Know if multiple implants should be placed in the aesthetic zone
- When and how to include orthodontics if needed for site development
- Know if pink ceramic should be used or should ridge augmentation be performed
- Know if the case should be splinted or broken up into separate bridges or individual teeth
- How to provisionalize the case throughout treatment
- When to immediately load cases versus do a serial extraction case
